

Finishing, Gear Cutting, Heat Treating, Surface Grinding

Johnson Enterprises stands behind our in-house and partnership supply chain capabilities. These practices are monitored by our quality and project management team at each process, giving our customers a complete finished product without the stress of dealing with multiple suppliers thus saving time and money.

...Our value is in the finishing touches.

When your project or parts call for value-added finishing, Johnson Enterprises has the experience and a network of partners to get the job done right. With our lean manufacturing techniques, we provide turnkey services and manage a variety of finished services, including:

- *Coatings – painting, plating, anodizing, passivation.*
- *Assembly.*
- *Gear cutting, internal splines, external splines.*
- *Surface grinding, centerless grinding, broaching.*
- *Heat treating, carburizing, carbo-nitriding, through hardening, vacuum heat treating, nitriding (gas & ion), normalizing, annealing, induction hardening, brazing, deburring and more.*
